# Field Inventory and Assessment

The following pages include information about the existing athletic field locations owned and/or managed by the Glenview Park District.

The field inventory and assessment provides a detailed picture of Glenview Park district's athletic field offerings. This information was inventoried in the fall of 2021 by the Consultant Team and Park District Staff.

#### Field Inventory Map

The map on the following pages documents the quantity and distribution of the Park District's soccer, football, lacrosse, softball, and baseball fields throughout the District. This map includes fields located at the District's park properties as well as fields located at school parks with which the District maintains intergovernmental agreements. It does not show field locations that are unaffiliated with the Glenview Park District.

#### **Athletic Field Summaries**

The field summary pages provide a high-level overview of total number, overall condition, and programmed use of all of the Park District's owned and managed fields by type of amenity. More detailed documentation of this data can be found in the athletic field inventory and assessment matrix.

#### **Athletic Field Inventory and Assessment Matrix**

This matrix inventories the number, type, size, and numerical ranking for each athletic field in District parks. The numerical ranking is based on the fields' grading and drainage, accessibility to the field and spectator areas, and the condition of the equipment, if any. These rankings are determined by averaging the scores for these three conditions. Rankings range from 1.0 - poor to 4.0 - excellent and are also indicated by color where

red represents the lowest rank and green the highest rank. For amenities where equipment is not needed or is provided by others, such as soccer and lacrosse fields, the equipment category was left blank and has no impact on the numerical ranking.

In addition to the ranking, the matrix also records other factors including the field orientation, overlap with other activities, available complementary amenities, and frequency of use. While these factors do not contribute to the numerical ranking, they are important considerations when prioritizing field improvements. Like the rankings, the field orientation is color coded to indicate the most favorable conditions. Again, green indicates the ideal north/south orientation while red shows the least preferred east/west field orientation where players are facing the sun.

The final factor recorded in the use matrix is the days per month each field is used as documented by the Glenview Park District documents the annual field use for each user group. The information included in the matrix is recorded from the 2021 records and documents the approximate use per month and total use for the year, the intensity of the field use, the type of user groups, and if the fields generate revenue.

#### **Amenity Types**

This report documents six types of athletic fields:

- Soccer Fields: Soccer fields were identified by 2021 soccer programming and maintenance records and are generally offered in the same locations and at the same sizes from year to year, however, they typically utilize movable goal posts and other amenities rather than permanent installations. Field location and size may vary to accommodate changing enrollment demographics and a need to rest portions of the field for overall grass health.
- Football Fields: The Park District maintains two types of football field, tackle and flag. Tackle fields are identified on the map as "Football Field" while flag fields are identified as "Flag Football Fields."
- Lacrosse Fields: Like soccer fields, lacrosse fields utilize movable goals and do not typically have permanent amenities associated with their locations. However, the Park District's lacrosse field sizes and locations are consistent from year to year.
- Softball Fields: Softball field locations are identified by their fully skinned infields and flat pitching mounds. The Park District provides fastpitch fields at Swenson Park and slowpitch fields at Community Park West.
- Baseball Fields: Baseball field locations are identified by their grass infields and raised pitching mounds. The Park District provides both permanent and movable mounds at it's various locations.
- Practice Fields: In addition to softball and baseball fields, the Park District maintains several practice field locations. These locations include backstops but lack full outfields and in many cases infields, bases, and player amenities like benches. Practice fields are not typically programmed or used by sports affiliates for organized play or practice. These fields are not shown on the inventory map.

# Court Inventory and Assessment

The following pages include information about the existing court locations owned and/or managed

by the Glenview Park District. This report only documents the District's outdoor courts.

The Court Inventory and Assessment provides a detailed picture of Glenview Park District's court offerings. This information was inventoried in the fall of 2021 by the Consultant Team and Park District Staff.

#### **Court Inventory Map**

The map on the following pages documents the quantity and distribution of the Park District's tennis, pickleball, paddle tennis, basketball, and volleyball courts throughout the District. This map includes courts located within the District's park properties as well as fields located at school parks with which the District maintains intergovernmental agreements. It does not show field locations that are unaffiliated with the Glenview Park District. This map also does not include the school basketball court locations that lack half or full court striping and/or overlap with other blacktop activities.

#### **Court Summaries**

The court summary pages provide a high-level overview of total number, overall rating, and programmed use of all of the Park District's owned and managed fields by type of amenity. More detailed documentation of these statistics can be found in the court inventory and assessment matrix.

#### **Court Inventory and Assessment Matrix**

This matrix inventories the number, type, size, and numerical ranking for each type of court in District parks. The numerical ranking is based on the courts' surfacing and drainage, accessibility to the court and spectator areas, and the condition

of the equipment. These rankings are determined by averaging the scores for these three conditions. Rankings range from 1.0 - poor to 4.0 - excellent and are also indicated by color with red representing the lowest rank and green the highest rank.

In addition to the ranking, the matrix also records other factors including the field orientation, available amenities in the surrounding park and at the court, and frequency of use. While these factors do not contribute to the numerical ranking, they are important considerations when prioritizing field improvements. Like the rankings, the court orientation is color coded to indicate the most favorable conditions. Again, green indicates the ideal north/south orientation while red shows the least preferred east/west field orientation where players are facing the sun.

The final factor recorded in the use matrix is the days of use per month each court is used. Glenview Park District documents the annual court use for each user group The information included in the matrix is recorded from the 2021 records and documents the approximate use per month and total for the year, the intensity of the court use, the type of user groups, and if the court generates revenue.

#### **Amenity Types**

This report documents six types of outdoor courts:

- Paddle Tennis Courts: Paddle tennis is played on elevated metal decking with a unique set of rules, equipment, and standard season. The Park District provides a complex of six courts at the Glenview Prairie Club for this sport.
- Tennis Courts: Dedicated tennis courts are locations that are stripped and set-up exclusively for tennis court play without any overlapping use by other activities. These courts are identified simply as "tennis court" on the map.
- Pickleball Courts: Dedicated pickleball courts are stripped and setup exclusively for pickleball play without any overlapping use by other activities. Pickleball court construction differs from tennis with a smaller court size and lower net. These courts are identified simply as "pickleball court" on the map.
- Tennis/Pickleball Courts: Tennis/pickleball courts are combined use amenities that are intended for interchangeable use by either activity and include permanent, overlapping striping for both sports. Because these courts utilize the taller tennis court net, tennis is often the perceived primary use with pickleball as a secondary activity. These combined court uses are identified on the map labels by an asterisk (for example: "tennis court\*")
- Basketball Courts: Basketball courts include full and half court layouts throughout the District with half courts counted as 0.5 courts. In addition to these designated and standard size court locations, there are several school locations within the Park District that provide basketball hoops without regulation striping. These locations are not included in the inventory and assessment but are listed in the appendix for reference.
- Volleyball Courts: The Park District provides outdoor sand volleyball courts at two park locations.

# **Benchmarks**

The following pages include analysis and benchmarking data that compares Glenview Park District's field and court offerings to state and national criteria.

# **Amenity Need**

Amenity need can be determined by comparing the current Park District athletic field and court locations to state and national benchmarks to determine how the District compares to other public recreation providers. This study includes two types of benchmarking.

## **SCORP Benchmarking**

This analysis takes into account useful life criteria as defined by the Illinois Statewide Outdoor Comprehensive Recreation Plan (SCORP).

Based on the Illinois SCORP, the District meets or exceeds the recommended number of field and court amenities for five of the six amenities outlined in the chart on the following page. The Glenview Park District also provides several amenities that are not recorded by the SCORP including pickleball courts, paddle tennis courts, and lacrosse fields, these amenities are noted as insufficient data or "ISD". Amenities that meet or exceed the recommendation are identified by green text in the "Surplus / Deficit" column. Items with red text noted in the "Surplus / Deficit" column are deficiencies. Of the recorded amenities, the Park District's only potential deficit compared to the SCORP is one softball field.

# **NRPA Amenity Benchmarks**

The National Recreation and Parks Association (NRPA) manages an online, self-reporting database known as Park Metrics where public recreation agencies can input data on their operations, properties, and amenities. This assessment compares Glenview Park District to 18 peer agencies located in the Midwest with populations between 55,000 and 65,000. The list of the peer agencies can be found in the appendix.

Compared to Park Metrics benchmarking, the Park District meets or exceeds the recommended number of fields and courts for six of the eight recorded amenities outlined in the chart on the following page. The Park District also offers two types of amenities that are not recorded by Park Metrics; pickleball courts and paddle tennis courts, which are indicated as insufficient data or "ISD". The amenities offered by the Park District that meet or exceed Park Metrics medians are shown by green text in the "Surplus / Deficit" column and items below the median are shown in red. Of the recorded amenities, the District is potentially deficient by six softball fields and one multipurpose synthetic field.

# **SCORP Benchmarks**

**Existing Population 2021** 

		Name		Illinois Facil	ity Average	Surplus / Deficit

# Park Inventories

The following pages provide a detailed inventory of the primary park sites with athletic field and court amenities.

The Consultant Team and Park District Staff identified 11 of the Park District's 31 parks and 13 school parks as key locations providing athletic field and court amenities. This group toured each of these sites to complete a detailed inventory of the park and amenity conditions and supplemental considerations such as drainage, support and additional amenities, and community context. The parks that were toured and included in this inventory are:

- Catherine W. Crowley Park
- Community Park West (CPW)
- Flick Park
- Gallery Park
- Glenview Prairie Club
- Richard E. Johns Park
- Richardson Park
- Roosevelt Park
- Swenson Park
- Westbrook School
- Willow Park

Each park spread includes general park observations, a keyed site map, and photos of the park amenities.

# Community Engagement

The Athletic Field and Court Assessment process included phone interviews with key stakeholder groups and surveys of participants who utilize the Park District courts and fields

#### **Stakeholder Interviews**

The stakeholder interviews consisted of online video calls between the Consultant Team and representatives of four sports affiliates who utilize and support the Park District's athletic offerings. Stakeholders provided information on their organization's history, enrollment, use of existing amenities, and future needs.

#### **Pickleball Survey**

An online survey was developed and released to Glenview resident and nonresident pickleball players to determine overall satisfaction and what players want for future pickleball programming and development.

#### **Sports Affiliate Survey**

aQuity Research created and distributed a survey to participants of the six sport affiliate groups. This survey focused on overall participant satisfaction and included opportunities for additional comments.

# Stakeholder Interviews

The stakeholder interviews consisted of online video calls with representatives of Glenview Titans Fastpitch Association (GTFA), Glenview Youth Baseball (GYB), Glenview AYSO (GAYSO), and Glenview Soccer Club (GSC).

#### **Items Discussed:**

The stakeholder interviews were structured as one-on-one conversations between the facilitators and a representative of each participant organization to determine the organization's overall satisfaction with the Glenview Park District and their organization's existing and anticipated needs. The following list of questions were used by the facilitators to lead the discussions. Some questions were skipped or were not asked as participants provided answers earlier in the conversation or if they were not applicable to the organization.

- 1. What league(s) does your organization run?
- 2. What have your participation numbers been in the past?
- 3. What do you expect your participation numbers to be moving forward?
- 4. What fields, courts and facilities do you use?
- 5. Are there any issues with the fields and courts that need to be addressed?

The following responses are not direct quotations, but rather a summarized interpretation of the participants' conversations.

#### **Participation:**

Overall, enrollment for all organizations has been growing over the past several years, however the 2020 sports seasons saw unusually low participation due to the COVID-19 pandemic. All organizations reported an increase in participation to "normal" pre-pandemic levels during the 2021 season and are expecting participation to continue to rise.

Estimated 2020/2021 Participation Numbers

GSC: ±500GTFA: ±80GYB: ±1,000GAYSO: ±1,000

Both GSC and GAYSO also noted that their enrollment includes significant participation from as other local communities such as Northbrook and Mount Prospect in addition to Glenview residents.

#### Field Usage:

While GPD fields are the primary locations for all organizations, GSC also rents spaces from other providers such as the synthetic turf fields at Northbrook Park District and indoor space at the Glenview Athletico. GYB also commented on the loss of multiple baseball fields in recent years and the recent split of GYB into two separate organizations is expected to create greater demand for GPD baseball fields in the future.

#### **Potential Improvements:**

General feedback and satisfaction with the GPD was positive across all organizations but a few participants provided examples of park locations to improve:

- Community Park West (CPW)
  - Soccer fields don't drain well and there are some issues with sprinklers heads and divots in the surface
  - Softball fields are slowpitch and do not work well for fastpitch play
    - Baseball play is not ideal on softball fields
- Westbrook School
  - The concessions window faces away from all of the fields
- Flick Park
  - Soccer field flooding near the pond is common
  - The soccer fields cannot be rotated which negatively affects their resting

Participants also mentioned other improvements that are not dependent on location:

- Interest in lighted soccer fields to eliminate the need for portable lights with generators and to improve the fall practice schedule
- GSC and GAYSO would prefer to rest fields more often which would require more space and more fields
- There is a lack of fastpitch fields
  - Irrigation is necessary
  - Rutting at pitching mound must be addressed
  - Need consistent surfaces (dirt) for warm-ups and foul balls
    - Consider synthetic turf
- Flexibility to convert between pinto and mustang baseball fields is preferred

Finally, participants provided their estimates on the ideal number and size of fields needed for their programs

- GSC: 2 additional, full size
- GTFA: Need 4 fastpitch fields total
- GYB: 2 removed pinto/mustang fields must be replaced
  - Preference to add 1 at Westbrook School
- GAYSO: Current number is sufficient for enrollment
  - Preference is to add more fields to reduce wear

#### Other Comments:

Overall it seems that the recreation opportunities are the most popular for these organizations and participants may leave these organizations in favor of travel play offered by others or to compete in other sports.

Both GTFA and GAYSO act as feeders to high school or competitive travel leagues as children age out of programs. GSC serves as a feeder for a local private organization. The representatives from GAYSO and GTFA also expressed interest in an indoor facility at Glenview which could be shared among multiple sports.

# Pickleball Survey

The online survey was developed to receive input from Glenview Park District pickleball players to understand the needs of the community. It was available 24/7 and consisted of 10 multiple choice questions and 2 open-ended questions.

#### **Participation and Traffic**

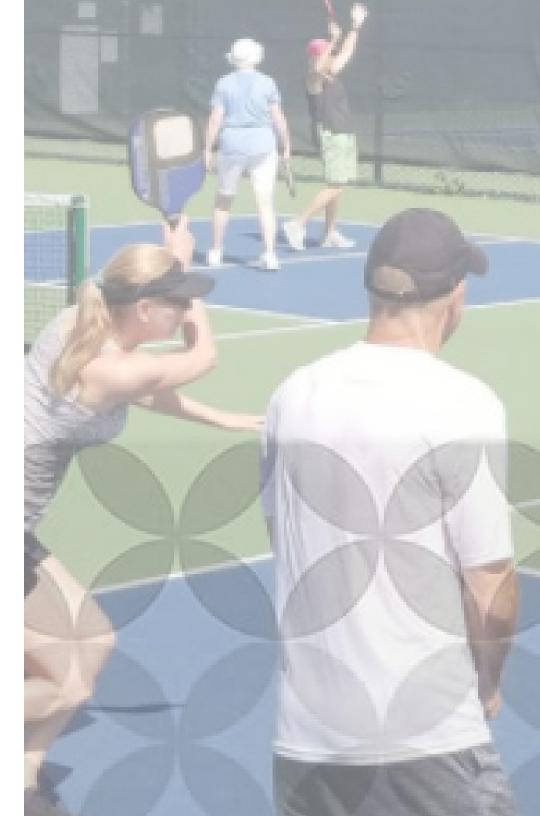

The survey was launched on December 8, 2021 and closed on January 10, 2022. Participants were invited to take the survey directly via email link. In total, 106 invitations were sent to people who were identified by Park District records as pickleball players or individuals who had expressed interest in the sport. Two additional reminder emails were sent to individuals who had not yet completed the survey at the approximate 2-week and 3-week milestones. 75 completed survey responses were received as well as one comment that was emailed directly.

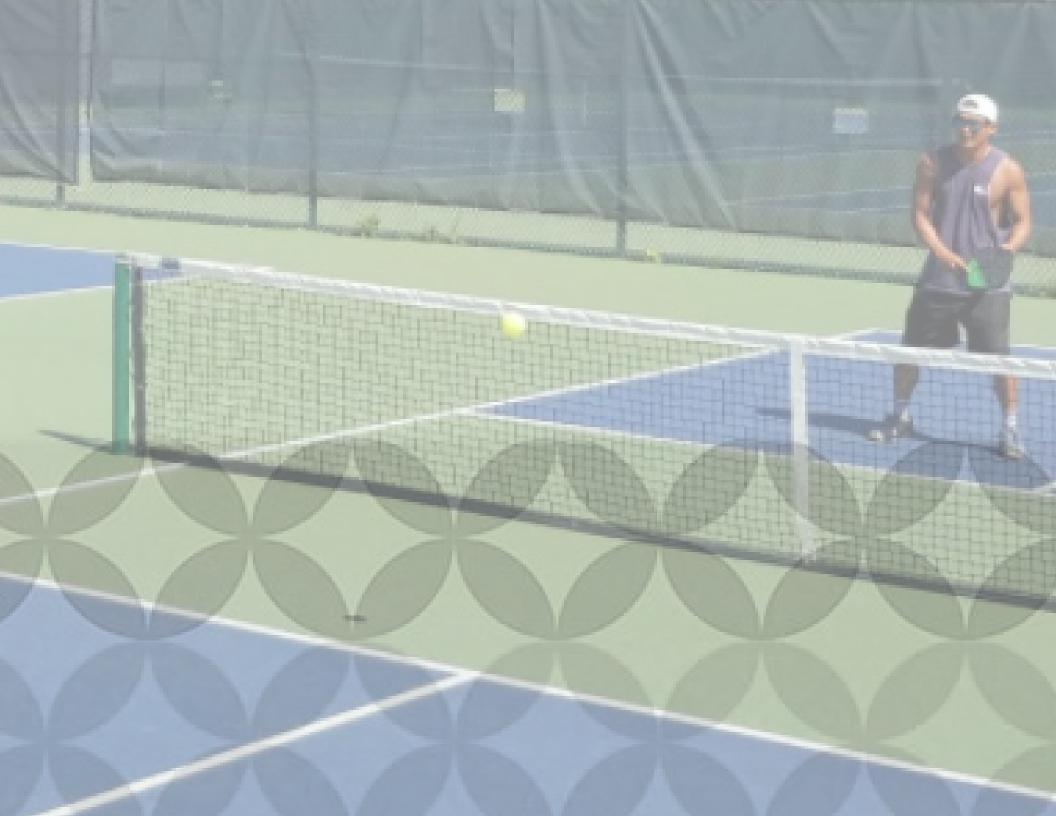

#### **Format**

The survey questions were focused on Glenview Park District's outdoor pickleball amenities and included a few demographic questions about the survey-taker. All questions were optional and provided participants the opportunity to skip the question. The following results do not reflect the views of all respondents but are a summary of the multiple-choice and ranking questions and the most prevalent comments.

#### **Results Format**

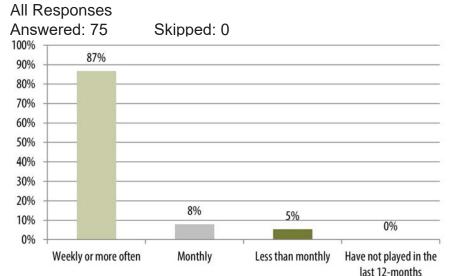

Each question is formatted with the summary of results for all participants listed first followed by the summary of results for Glenview residents only, where applicable.

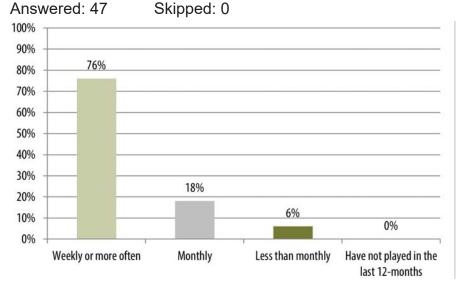

#### **Survey Results:**

## 1. On average, how often have you played pickleball AT AN OUTDOOR COURT in the past 12-months? (Pick one):

# 5. Rate the following potential improvements for the OUTDOOR pickleball facilities in Glenview from most (1) to least (7) important:

All Responses

<sup>\*</sup>the highest score represents the most important item

#### Glenview Resident Responses Answered: 47 Skipped: 0

<sup>\*</sup>the highest score represents the most important item

#### 6. Are there any other improvements you would like to see for the OUTDOOR pickleball facilities in Glenview?

All Responses

Answered: 48 Skipped: 27

48 survey participants provided additional recommendations for the Park District's outdoor pickleball courts including adding lights (7), seating (3), trash cans (2), rules signs (2), windscreens (1), and shade (1). Participants also commented on their preferred locations for some elements including providing racks and benches outside of the courts for the safety of the players. Two participants also commented that they would like more space between the courts and/or between the courts and fence.

Many responses commented on the high use of the existing dedicated pickleball courts with five noting that it is too crowded and three commenting on the long wait times for courts. The need for more courts were noted by seven responses with an additional 3 requesting they be dedicated courts, five requesting they be added at Flick Park, and one suggesting courts be added on the east side of the Park District. A few participants also noted their interest in more availability for indoor pickleball play (2) or improving the existing outdoor courts for 4-season play (1).

Several participants also made recommendations for programming with interest expressed for leagues (2), lessons (1), tournaments (1), drop-in programs (1), and a club (1). Others provided suggestions for the operations of the courts with a few supporting reservation systems (2) or offering Glenview resident priority (1). Others expressed their preference for open play (1) or requested enforcement of the open play rules to prevent large groups from "taking over" courts (2).

Glenview Resident Responses Answered: 34 Skipped: 3

34 survey participants provided additional recommendations for the Park District's outdoor pickleball courts including adding lights (6), seating (3), trash cans (2), rules signs (1), windscreens (1), and shade (1). Participants also commented on their preferred locations for some elements including providing racks and benches outside of the courts for the safety of the players. Two participants also commented that they would like more space between the courts and/or between the courts and fence.

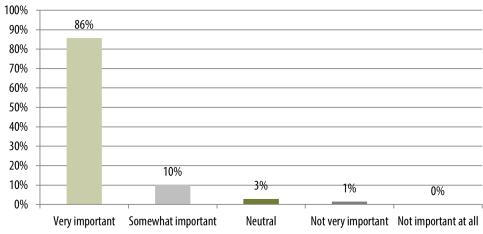

Many responses commented on the high use of the existing dedicated pickleball courts with two noting that it is too crowded and two commenting on the long wait times for courts. The need for more courts were noted by four responses with an additional two requesting they be dedicated courts, three requesting they be added at Flick Park, and one mentioning the need to also keep tennis courts. A few participants also noted their interest in more availability for indoor pickleball play (2) or improving the existing outdoor courts for 4-season play (1).

Several participants also made recommendations for programming with interest expressed for leagues (2), lessons (1), tournaments (1), drop-in programs (1), and a club (1). Others provided suggestions for the operations of the courts with one participant expressing their preference for open play, a few supporting reservation systems (2) and one supporting offering Glenview resident priority (1). Two comments also commented that large groups including non-resident players sometimes monopolize the existing courts.

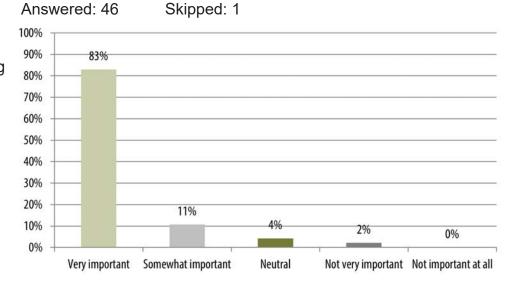

# 7. How important is it to you to play on a dedicated court (pickleball only) vs. dual purpose (combined tennis and pickleball) courts?

# 12. Thank you for your feedback. Let us know any other thoughts for improving outdoor pickleball facilities in Glenview in the comment box below:

All Responses

Answered: 22 Skipped: 53

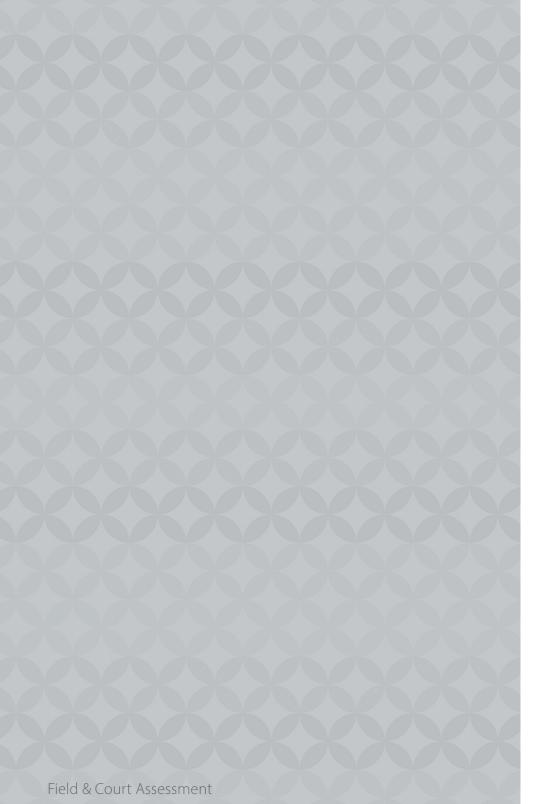

22 survey participants responded with a variety of potential improvements to the existing courts and for the addition of new pickleball facilities. The most common responses for improvements to the existing courts included adding lights (3). a drinking fountain (1), covered seating areas (1), more parking (1), and better maintenance (1). Participants also referenced long waits for courts and the busyness of the existing courts (one comment each). Several responses requested the addition of more dedicated pickleball courts (2) with an additional 4 participants specifying their preference for more courts at Flick Park. One response also noted the importance of maintaining tennis courts rather than replacing them with pickleball courts. Participants also commented on their preferences for using the courts: four people noted that they like open, drop-in play while three commented that they would like to see a reservation system added. A few people expressed their interested in pickleball leagues (3).

One participant who completed a survey provided additional comments via email about how the Park District might increase indoor pickleball opportunities as well.

Glenview Resident Responses

Answered: 16 Skipped: 31

16 survey participants responded with a variety of potential improvements to the existing courts and for the addition of new pickleball facilities. The most common responses for improvements to the existing courts included adding lights (3) and covered seating areas (1). Participants also referenced long waits for courts and the busyness of the existing courts (one comment

each). Several responses requested the addition of more courts (4) or specifically requested dedicated pickleball courts (1) with an additional 3 participants specifying their preference for more courts at Flick Park. Participants also commented on their preferences for using the courts, one person noted that they like open, drop-in play while two commented that they would like to see a reservation system added. Three resident responses also commented on how the high use of Glenview's pickleball courts has limited Glenview resident access to the courts under the current open play system and due to the number of courts. A few people expressed their interested in pickleball leagues (3).

102

# Sports Affiliate Survey

Glenview Park District engaged aQity Research to collect information about user experience and satisfaction from participants in the District's six sports affiliate groups in 2022.

#### **Participation and Methodology**

The Affiliate Leagues' Member Survey consisted of an online survey with multiple choice and open ended questions. Questions included participants' overall satisfaction with the league, satisfaction with components of the league such as safety, registration, communication, and instruction, and opportunities to provide additional comments. Each affiliate group provided aQity with a membership list and contact information for households with one or more children who had participated in the organization in the last three years (2019-2022). These organizations included:

- Glenview Youth Soccer Association (45 survey responses)
- Glenview AYSO (147 survey responses)
- Glenview Youth Baseball (GYB) (191 survey responses)
- Blaze Baseball (51 survey responses)
- Glenview Titans Fastpitch Association (35 survey responses)
- Glenview Stars Hockey (70 survey responses)

aQity consolidated the membership lists from the six organizations to ensure that each household only received one survey invitation. In order to accommodate households with multiple children, or one or more children who have participated in multiple affiliate groups, participants were instructed to select and provide feedback for all affiliate groups they have had experience with.

#### Results

The following key findings are a summary of the survey questions and open ended responses and are not direct quotations

Affiliate	Top Strengths	Top Concerns/Opportunities for Improvement	Other Comments
Glenview Youth Soccer	<ul> <li>Ease of registration, participant physical safety</li> <li>Developing sports skills, quality of instruction</li> <li>Sufficient level of competition</li> </ul>	<ul> <li>Quality of fields</li> <li>Caliber of referees, level of sportsmanship</li> </ul>	<ul> <li>Lowest response rate from contacts provided</li> <li>A few comments re: field conditions (e.g., turf issues, goose droppings, etc.)</li> </ul>

Affiliate	Top Strengths	Top Concerns/Opportunities for Improvement	Other Comments
Titans Fastpitch Softball	<ul> <li>Consistently strong         satisfaction scores, especially         for participant safety,         communication with coaches,         ease of registration, teaching         sportsmanship, overall         communication, engaging with         Board members</li> <li>Strongest Likelihood to         Recommend/Net Promoter         scores (nearly considered         "world class")</li> <li>Strong ratings for being         appropriately competitive</li> <li>Highest level of expected         retention (re-registration)</li> </ul>	Quality of fields, umpires, and quality of instruction	<ul> <li>Fewest contacts/respondents</li> <li>Improve field conditions (e.g., dugouts, batting cages/hitting nets)</li> <li>Some feel that more attention/priority is paid to boys' sports teams/ fields</li> </ul>
Stars Hockey	Ease of registration, overall level of organization	<ul> <li>Generally lower scores compared to other affiliates, especially on sportsmanship, communication, developing sports skills, communication with Board</li> <li>Lowest Likelihood to Recommend/ NPS scores (more Detractors than Promoters)</li> <li>22% feel Stars Hockey is not competitive enough (vs. only 4% saying it is "too competitive")</li> <li>Second highest expected attrition (24% do not plan to re-register, mostly due to affiliate issues)</li> </ul>	<ul> <li>Concerns over team selection, number and caliber of teams</li> <li>Concerns over caliber of coaching</li> <li>Dissatisfaction with Board and/or director(s)</li> <li>Better communication and more transparency in general</li> </ul>

## Recommendations

This section includes recommendations for the future development of athletic fields and courts considering the inventory and analysis and community input results

The Consultant Team developed several alternative concepts to accommodate the Park District's changing athletic field and court needs based on the results of the inventory and analysis and community input. These concepts explored the total number of each type and size of court and field needed as well possible park locations. The Consultant Team and Staff reviewed and refined these concepts into 2 preferred concepts which were presented to the Committee of the Whole (CoW). Then, CoW and additional staff comments were incorporated into the final concept included in this report.

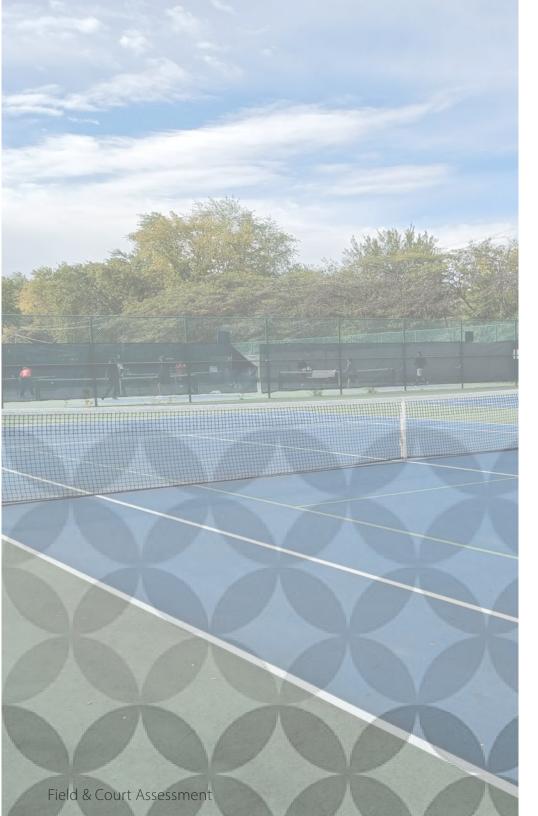

#### **Concept Summary**

The final, preferred concept focuses on elevating the existing uses of the Park District's community parks at Flick Park and Community Park West while making limited additions and improvements at Westbrook School. In total, these improvements would result in eight new pickleball courts, up to three new mustang baseball fields, improvements to the softball fields, and the potential for a multipurpose synthetic turf field.

#### Flick Park

Flick Park is the District's home for pickleball play and preferred site for future pickleball expansion as indicated in the Pickleball Survey. This locations also offers the opportunity to accommodate other pickleball considerations while addressing some reported problems with the existing courts. By locating a new bank of eight courts to the south of the north parking lot, pickleball players will have the ability to disperse throughout the park which is expected to alleviate some of the concerns about overcrowding. These eight courts will also include sports lighting, shaded center seating areas, and north/south court fence dividers to create tournamentstyle courts. This second location also presents an opportunity for the Park District to trial and implement additional management and programming strategies such as a reservation system without disrupting the free-play atmosphere that is highly valued by many of the existing players. Additionally, Flick Park has the space and resources needed to support additional courts including sports lighting, parking, access from a main road, and restrooms. It also is expected to have sufficient space to accommodate stormwater management if the addition of new hard courts requires additional mitigation.

Flick Park is also the recommended location for a new baseball field. The current field's backstop, fencing, and infield are in poor condition and it is not programmed. The restoration of this mustang field to playing condition will help fulfill the need for more baseball fields and it has the potential to become a premier location due to Flick Park's allowance of sports lighting and the lack of seasonal overlap between the baseball outfield and the new flag football field layout of two smaller fields.

#### **Westbrook School**

Westbrook School recently lost two baseball fields due to the expansion of the Westbrook Elementary School building but remains the preferred baseball destination for affiliate leaders and players despite the reduction in capacity. Park District staff, Board members, and affiliate players identified the southeast corner of the park as a potential location to regain one mustang field and restore the park's festive game day atmosphere. While this location presents challenges due to significant earthwork and the possible necessity of netting and other safety measures it also benefits from existing support amenities including a concessions and restroom building, electrical service for scoreboards, access from a main road, and parking.

#### **Community Park West (CPW)**

CPW is the Park District's primary sports complex and offers many advantages including lighting, easy access, parking, and an existing maintenance facility. Rather than build CPW to capacity, the Park District relies on the significant open space in the west of the park as a potential future development location and temporary soccer field location. This use is maintained with minimal disturbance and focuses development on elevating the existing fields with two concepts.

Concept A minimizes disturbance to the park by maintaining existing land uses in-place. This concept adds two new mustang fields near the existing baseball complex which will include shade and player and spectator seating and the option for a partnership between the Park District and baseball affiliates to add sports lighting. This concept also identifies improvements for the five existing softballs fields with the addition of shade and pitching and batting warm-up areas and the optional partnership of the Park District with softball affiliates to add sports lighting, providing equal amenities to the baseball program. One or more of these fields may also be converted from slowpitch to fastpitch fields to better align with the current affiliate programming and use.

Concept B provides an opportunity for the Park District to add a multipurpose synthetic turf field for soccer, football, and lacrosse programming at the northeast corner of the park, creating a soccer complex within CPW. The addition of this type of field would meet a growing demand and expectation for publicly available turf and has the potential to reduce the strain on the District's natural grass fields. This also allows for one of the two displaced softball fields to be rebuilt as a fastpitch field north of the existing baseball fields and for the additional of an additional mustang field which can be used for softball practice as well as baseball programming. The consolidation of each of these sports will be the catalyst in creating

community-gathering hubs that are currently lacking at CPW. Additionally, the new softball field will provide the opportunity to elevate the softball amenities to an equal level as baseball with the addition of shade, storage, and spectator accommodations.

#### **Proposed Inventory Table - with CPW Concept A**

	Existing # of Facilities (at current standards)	Proposed Additions	Proposed Total	Net Gain / Loss
Shared Tennis/Pickleball	11		11	0
Dedicated Tennis	30		28	0
